

Price

Mini is identical to Standard configuration and allows to perform structural engineering analysis using the maximum of 5000 nodes and elements. It's well-suited for local structural problems analysis, e.g. floor slabs, beams or columns analysis.

Standard software configuration allows to perform structural engineering analysis without size (nodes and elements) limit.

PRO configuration performs all the analysis that Standard version does but with geometrical and physical nonlinearity taken into account.

FULL version includes a complete list of LIRA 10.6 functional capabilities.

Prices are given in euros

Table 1. License cost for software package modules

LIRA 10.6 for PC based on x86/x64 architecture	Configuration				
	Mini	Standard	PRO	FULL	Custom optional configuration
Basic configuration: - graphical user interface - linear static analysis - linear dynamic analysis - calculation of design combination of forces (DCF) - calculation of design combination of loads (DCL) - calculation of loads on fragment of the structure - strength of cross section test (LITERA) - cross section designer - condensation of masses (mass redistribution into defined nodes of the design model) - import/export from/in Revit, Tekla & etc.	+	+	+	+	2 000*
Stability	+	+	+	+	250
Design system for reinforced concrete structures (RCS)	+	+	+	+	550
Design system for steel structures (SS)	+	+	+	+	400
Physical nonlinearity	-	-	+	+	600
Geometrical nonlinearity	-	-	+	+	600
Assemblage	-	-	-	+	600
Direct dynamic analysis (Dynamics+)	-	-	-	+	600
Soil	-	-	-	+	600
Variation of models	-	-	-	+	600
Bridge	-	-	-	+	600
Pushover Analysis (nonlinear quasistatic analysis of dynamic problems)	-	-	-	+	600**
Temperature field analysis	-	-	-	+	600
Determination of geometric properties of bar's composite cross section	-	-	-	+	600
Total:	1 200	3 200	4 400	7 300	
* Upon purchase of separate systems highlighted item is mandatory					
** Pushover Analysis module runs upon Physical nonlinearity presence					

Table 2. Discount system

Number of simultaneously acquired licenses	Mini	Standard	PRO	FULL	Custom optional configuration
2 licenses (20% total cost discount)	1 920	5 120	7 040	11 680	20% discount
3 licenses (30% total cost discount)	2 520	6 720	9 240	15 330	30% discount
4 licenses or more	By agreement				

Table 3. Cost of upgrade from previous versions

Version/Configuration	Mini	Standard	PRO	FULL	Custom optional configuration
LIRA 10.x (80% discount from LIRA 10.6 cost)	240	640	880	1 460	80% discount
LIRA 9.x (60% discount from LIRA 10.6 cost)	480	1 280	1 760	2 920	60% discount

Table 4. Special offerings

Configuration name	Price
LIRA 10.4 FULL for IHE (license for 20 workplaces + 1 local license for teacher)	690
LIRA 10.4 FULL for users of alternative systems	5 110
LIRA 10.4 PRO for users of alternative systems	3 080
